

Fibrapan TEX EZ is a new range of decorative MDF boards providing different textures embossed on its surface.

This low formaldehyde board offers a compact surface, ideal for the application of different types of varnishing or painting. The texture is only supplied on the top side.

All the boards synchronize the reproduction of the textures on the entire surface, which facilitates the cutting, machining or panelling in different applications.

Sheets come in RAW MDF and are available on a per sheet basis.

	Range	Size	Thickness (mm)
	Fibrapan RAW EZ TEX Prisma	2800 x 1045	19
	Fibrapan RAW EZ TEX Trama	2800 x 1045	19
