TRADITION & EXPERTISE

# Introduction

November 2020

Welcome to FINSA, we're a Spanish manufacturer of decorative and structural wood-based products (chipboard, MDF, and superPan). FINSA materials are distributed across the globe and used in various sectors, from industrial manufacturers, hotel fit outs, large scale residential developments, designer furniture makers to construction sites and more.

This brochure is a collection of materials available across Ireland and Northern Ireland on an express service from our 150,000m<sup>2</sup> warehouse in Drogheda, Ireland.

Our team will work with you to ensure you get high quality materials to you when you need them.

Thanks for being a FINSA Ireland customer,

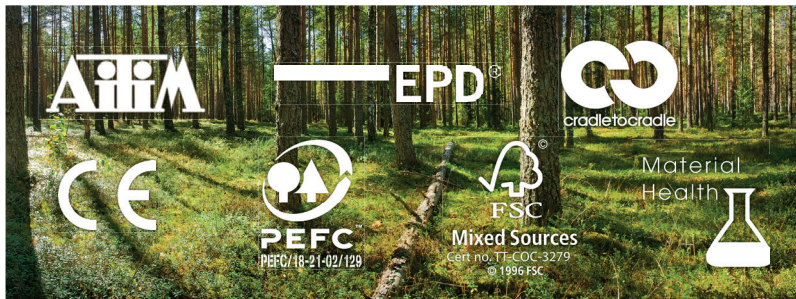

**José Quintas**  
Managing Director  
FINSA Ireland

# Circularity of our products

FINSA is committed to nurturing our environment, and we respect it in all of our processes. We obtain our main raw material – timber, from nature, and it is our duty to respect and protect this ecosystem.

From sustainable management of our forests, to producing our entire product range, we have taken care to ensure we are delivering our products in a sustainable way to you. Our development team are working to deliver our sustainability policy which included hitting a number of milestones along our way.

These include working with partnership organisations such as Cradle 2 Cradle and Declare to achieve certification to provide transparency for our customers. Below is a list of accreditations that we have achieved on our journey to date.

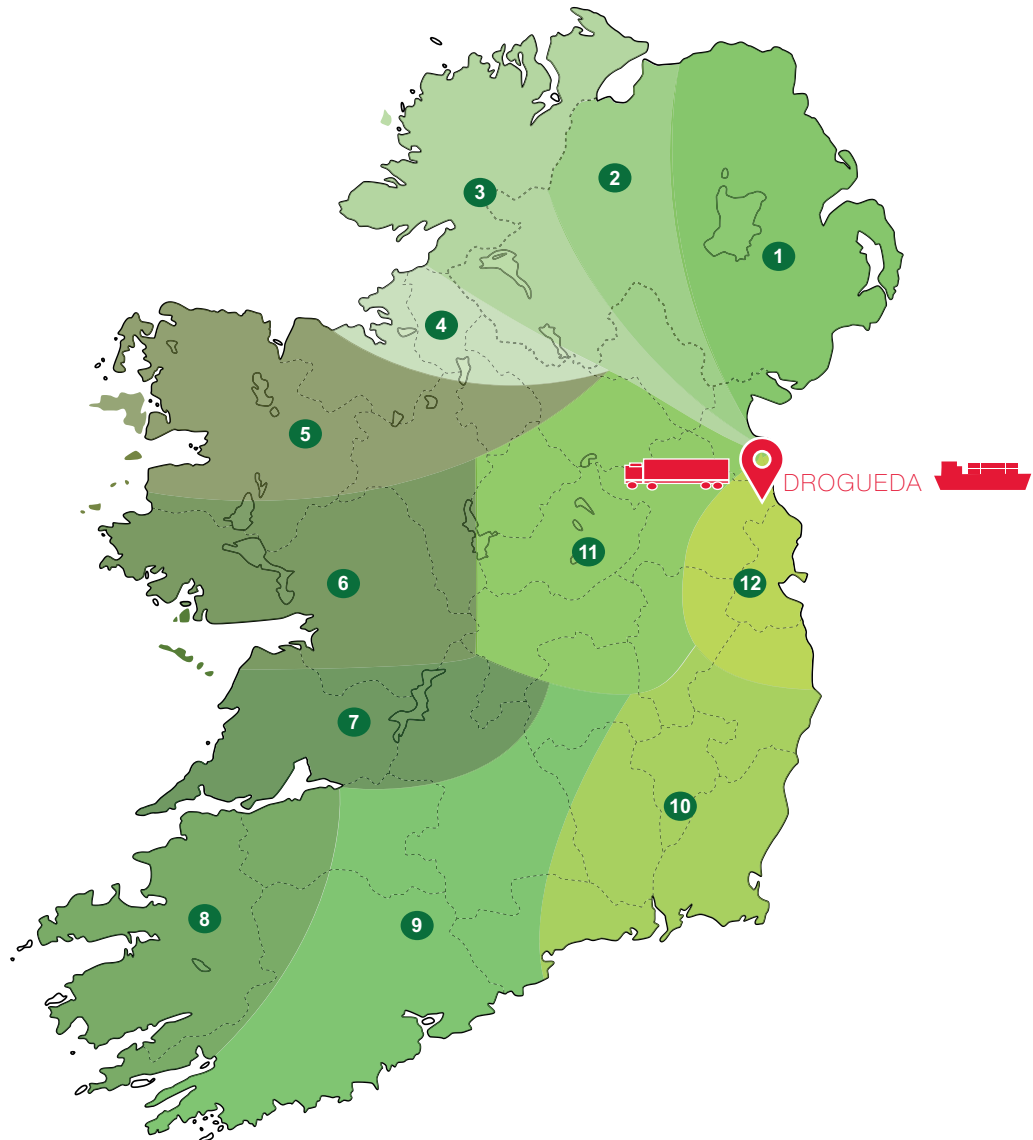

Finsa Ireland is a member of the Irish Green Building Council

## Getting the goods to you

Our warehouse is located in the port town of Drogheda, which is perfectly located on the east coast of Ireland, 56km (35 miles) north of Dublin. This allows us to distribute a wide range of goods from our factories in Spain and Portugal. This large warehouse is used to maximum advantage to maintain a fixed stock from which we can deliver a wide range of product within 5 working days, throughout Ireland.

### Express Service : Routes and Frequencies

Minimum order quantity for Route service: 6 tonne weight [4 bales of 8 x 4 or equivalent] Surcharge applies for quantities less than this. A full truck service is available on request.

- 1 **NORTH EAST** Wednesday
- 2 **NORTH CENTRAL** (Monahan Derry) Tuesday and Thursday
- 3 **NORTH WEST** (Donegal) Thursday
- 4 **WEST NORTH WEST** (Sligo) Friday

STANDARD SOLUTIONS

## Fimapan Chipboard

Homogeneous and smooth surface. It accepts any kind of decorative coating.

Excellent behaviour in any subsequent processing.  
 P2 classification: indoor use in dry environments.  
 E05 classification: low formaldehyde content.

Size (mm)	Thickness (mm). Sheets per bale. Material code.		
	12	15	18
2440x1220	60	50	40
	40000347	40000349	40000351

## Fibranor

Thin board made of selected wood fibres (MDF)

Fibranor can be easily glued, printed, veneered or coated with PVC or decorative paper through simple technologies. Its excellent strength/weight relation makes it ideal for a wide variety of uses.

E05 classification: low formaldehyde content.

Size (mm)	Thickness (mm). Sheets per bale. Material code.	
	3	6
2440x1220	240	120
	40000072	40000075

## Fibrapan Standard MDF

Fibrapan is a high quality MDF manufactured from wood fibres and agglutinated by synthetic resins with pressure and temperature.

This product has a uniform and homogeneous structure allowing further work on faces and edges.

Size (mm)	Thickness (mm). Sheets per bale. Material code.

new **superPan**<sup>®</sup>  
patented

Wood particle board core with 2 MDF faces

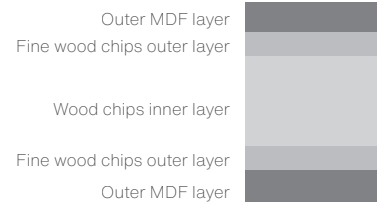

STANDARD SOLUTIONS

superPan is exclusively manufactured and patented by Finsa, it combines the main advantages of both MDF and chipboard panels.

Our superPan now has a new and innovative structure consisting of multi layers, that improve the physical and mechanical properties of the panel.

Its outstanding mechanical and physical properties make superPan a highly versatile panel, appropriate for multiple applications.

**New and innovative multi layer structure that improves the physical and mechanical properties of superPan.**

**Performance benefits**

Perfect cut, longer tool life

Easier and better edge banding

Improved screw/nail holding (also in edges)

High bending strength and high modulus of elasticity

Ideal for Lacquering/ Painting applications

Wide variety of coatings and finishes available

Size (mm)	Thickness (mm). Sheets per bale. Material code.

How superPan is made

# Recoatable solutions

## Fibraplast Hidrofugo Recoatable

Melamine MDF

Moisture resistant recoatable  
with smooth finish

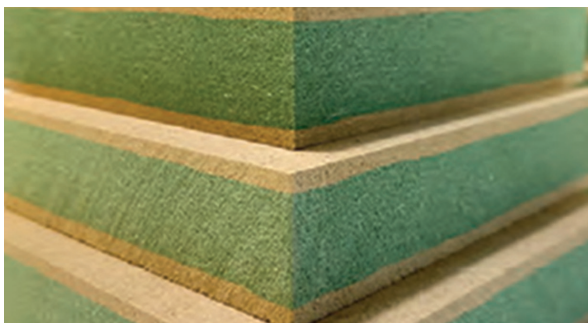

Its coating is impregnated with a special MF resin that offers the ideal base for the subsequent application of lacquer or paint. The special paintable surface shows good adherence for lacquers or paints. It reduces the need for pre-treatment depending on the quality of the varnish and process used. Also, the high quality moisture resistant MDF (Fibrapan Hidrofugo) will offer higher protection in environments with moisture as well as allow demanding machining providing a fine finish.

Size (mm)	Thickness (mm). Sheets per bale. Colour. Texture. Material code.
	<b>18</b>

	40047260

## Fibrapan Hidrofugo

### Moisture resistant MDF

3 layer [16mm to 30mm only]

Made with selected medium-density wood fibres (MDF), bonded together with synthetic resins under pressure at high temperature, especially suited for indoor applications in humid environments.

Classification E1, low formaldehyde emission.

The moisture-resistant Fibrapan is certified by the Aitim: 9-04-07; 9-04-08, 9-4-09 and 24-3-01 seals of quality, and is EC marked by AENOR.

#### Applications

- Any piece of furniture that requires demanding machining and/or lacquering, where moisture resistance is a must.
- Lacquered kitchen doors, gables, radiator coverings, mouldings, etc.

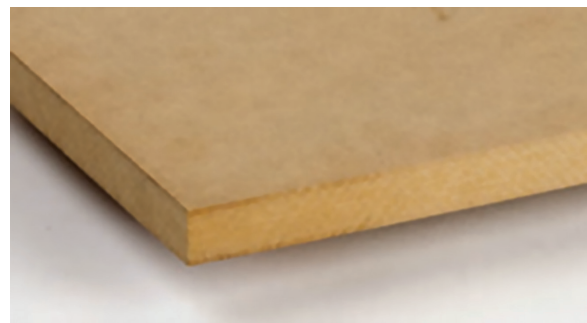

Size (mm)	Thickness (mm). Sheets per bale. Material code.

\*6mm is Fibranor Hidrofugo

## Fibralac

### Deep routing quality no dye MDF

Fibralac is made of selected wood fibres (MDF) and specially designed for lacquering

Fibralac is an MDF board with a smooth surface and compact edges, good dimensional stability, and low absorption of water, varnishes and solvents perfect for painting/lacquering applications.

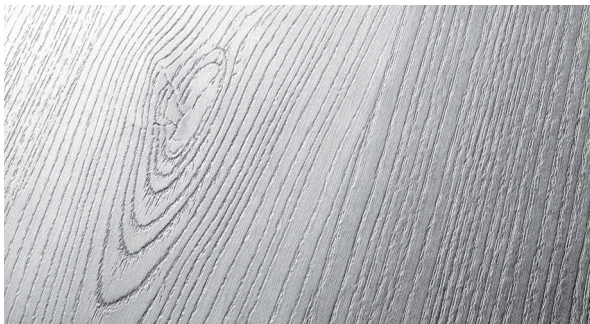

Due to its technical characteristics Fibralac is ideal for when demanding machining of the board is needed e.g. routing.

#### Applications

- Painted and/or 3D furniture pieces. Fronts, gables, displays, etc.

Size (mm)	Thickness (mm). Sheets per bale. Material code.	
	18	22
2440x1220	40	30
	40004916	40012654

**Fibraplast LAC recoatable**  
Ash Tango embossed melamine,  
deep routing, recoatable

The Fibralac base-board used in this product is specially designed for lacquering, with smooth surface and compact edges, good dimensional stability and low absorption of water, varnishes and solvents, making it perfect for painting / lacquering applications.

Its coating is impregnated with a special MF resin that offers the ideal base for the subsequent application of lacquer or paint. The special structure of the paintable surface shows good adherence for lacquers or paints, reducing the need for pre-treatment depending on the quality of the varnish and process used.

The high quality deep routing MDF will allow any demanding profiling and machining, providing a top finish.

**Fibraplast 400**  
**Melamine White Recoatable**

For those customers who wish to paint or lacquer a thick light-weight MDF product for furniture/interiors, this is the solution. It has the additional advantage of being in the 8 x 4 size for convenient transportation and handling.

**Applications:**

- Painted open storage units
- Shopfitting
- Gables
- Sliding doors
- Partitions

Size (mm)	Thickness (mm). Sheets per bale. Material code.
	<b>45</b>
<b>2440x1220</b>	16

## Fibracolour MDF coloured throughout

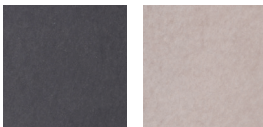

Our Fibracolour – is an MDF made of selected Wood fibres The product is coloured throughout.

Fibracolour offers new solutions to the decoration and interior design industries, as it allows a wide variety of aesthetic effects and innovative finishes, such as lacquers, waxes or clear varnishes. It can be coated with natural veneer or melamine, highlighting the contrast between the surface and the edges of the product.

Fibracolour is made with non-toxic water-based pigments.

## Grooved MR MDF Grooved moisture resistant MDF

Using our Fibrapan Hidrofugo board – produced with selected medium-density wood fibres (MDF), bonded together with synthetic resins under pressure at high temperature, especially suited for indoor applications in humid environments.

Classification E1, low formaldehyde emission.

The moisture-resistant Fibrapan is certified by the Aitim: 9-04-07; 9-04-08, 9-4-09 and 24-3-01 seals of quality, and is EC marked by AENOR. High dimensional stability, low swelling and absorption. It accepts any type of decorative coating.

### Important Characteristics

- High dimensional stability
- Low swelling and absorption
- Excellent machining quality
- Highly resistant to moisture

### Applications

- Ideal for painted kitchen gables or wall panelling

Size (mm)	Thickness (mm). Sheets per bale. Material code.

	40839901	40831332

# Light weight solutions

## Iberpan 400

Thick lightweight MDF  
400kg density

This board has been developed to provide a light weight solution to the issue of excessive weight of thick pieces and complications derived from bonding sheets. Ideal to coating with veneer or HPL. Finsa does not recommend this product for lacquering applications.

### Applications:

- Home furniture: shelves, table or tops, wardrobe doors or gables, interior door cores, sliding doors, etc.
- Furniture for fairs and exhibitions; screens; partitions.

### Advantages:

- Lightness: reduction in the weight of large pieces with greater dimensions.
- Easy-to-handle
- Iberpan 400 allows standard handling processes, cuts and edge-bandings.

Size (mm)	Thickness (mm). Sheets per bale. Material code.
	45
2440x1220	16
	40646376

## Fibraplast 400

Melamine White Recoatable

For those customers who wish to paint or lacquer a thick light-weight MDF product for furniture/interiors, this is the solution. It has the additional advantage of being in the 8 x 4 size for convenient transportation and handling.

### Applications:

- Painted open storage units
- Shopfitting
- Gables
- Sliding doors
- Partitions

Size (mm)	Thickness (mm). Sheets per bale. Material code.
	45
2440x1220	16
	40863232

## Lightweight Veneered MDF 400kg/m<sup>3</sup>

FINSA Lightweight veneered MDF is made from quality wood veneers which are bonded to Iberpan 400 to provide a lightweight decorative solution. It machines as easily as any standard panels and accepts any normal fixings and fittings, and yet weighs approximately 400kg per cubic metre making it 40% lighter than standard MDF.

FINSA Ireland stocks the most popular veneer species like white oak and walnut for short lead delivery.

Size (mm)	Thickness (mm). Sheets per bale. Colour. Material code.	
	41	41
2440x1220	9	9
	White Oak 035 037 40859216	Walnut 035 037 40539545

## Lightweight Plain superPan® Star

superPan star consists of two external faces of wood fiber and a core of wood chips, combined with a synthetic polymer.

Developed in collaboration with BASF and exclusively manufactured and patented by Finsa, superPan star combines lightweight and quality in one product. Its technical and mechanical properties are comparable to chipboard, weighing 20% less, offering a light, versatile and technically efficient solution.

superPan is an extremely versatile panel, highly suitable for various applications in dry environments, such as:

- General furniture
- Worktops
- Doors
- Inner doors
- Screens and walls for booths / events

Size (mm)	Thickness (mm). Sheets per bale. Material code.
2850x2100	12
	40787170

# Fire retardant solutions

## Fibrapan Ignifugo E-Z Fire Retardant MDF

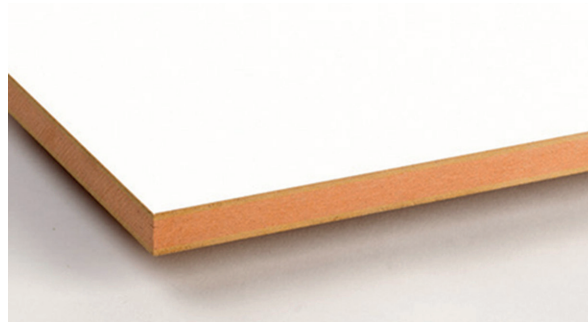

A wood fibre board made with selected medium-density wood fibres (MDF), bonded together with synthetic resins and fire-retardant additives using pressure at high temperature. Fibrapan Ignifugo offers great dimensional stability, low swelling and low absorption. Sheets can be machined.

### Applications:

- Great dimensional stability.
- Low swelling and low absorption.
- Allows for any type of decorative coating.

# Technical/construction solutions

## superPan® Tech P4

Flooring grade tongue and groove on 2 long edges

A board made up of wood fibres on the surfaces and wood chips in the core. P4 classification: Load-bearing boards for use in dry conditions.

superPan Tech P4 is CE marked according to European standard EN 13986, certified by AENOR with no. 0099/CPD/A65/0008.

superPan Tech P4 Ranked as a P4, load-bearing boards for use in dry conditions.

### Applications:

- Refurbishment and renovation of spaces
- Construction of residential facilities
- Innovative construction systems

Size (mm)	Thickness (mm). Sheets per bale. Material code.
	18
2440x600	40
	40378779

Other technical/construction solutions are available on forward order, such as:

- CLT (Cross Laminated Timber)
- superPan Tech P5 racking board
- Thermopine Cladding
- superPan Encoform formwork board

## superPan® Tech P6

Flooring grade tongue and groove on 2 long edges

superPan Tech P6 Board is made up of wood fibres on the surfaces and wood chips in the core. P6 classification, high-performance structural boards to use in dry environments.

superPan Tech P6 is CE marked according to European standard EN 13986, certified by AENOR with no. 0099/CPD/A65/0008.

### Applications:

- Construction of industrial mezzanines
- Construction of floor slabs
- Storage platforms and industrial shelving
- Refurbishment and renovation of spaces
- Construction of residential facilities innovative construction systems

### Important characteristics:

- High mechanical strength equal resistance in any direction of the board
- Fast and easy installation with conventional woodworking tools
- Significant savings in installation time and costs
- Excellent value for money versatility of formats
- Wide variety of coating possibilities smooth and compact surface, supports direct painting or coating
- Excellent screw or nail fixing

Size (mm)	Thickness (mm). Sheets per bale. Material code.

# Certified Hygiene and Antibacterial Melamine Collection

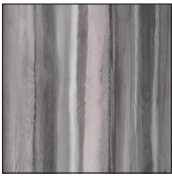

## Studio Melamine Collection

Available on 18mm Fibrapan MDF CORE – Fibraplast Studio

Inspirational textures, finishes and designs on our Fibrapan MDF core. With music and nature as main sources of inspiration, the Studio Collection combines excitement and innovation, inviting us to discover a new generation of high performance, deeper, more authentic surfaces.

### Blues

Inspired by the grain of oak wood, Blues is one of the deepest finishes in the Studio Collection. An elegant finishing work, extremely natural and silky to the touch. The uniqueness of the designs Chicago Oak and Memphis Oak is clearly enhanced when combined with the Blues finish.

Geo Wood

Roble Chicago

Roble Memphis

### Rock & Roll

The finish combines the distinctive features of various materials, such as wood, stone and textiles into a single surface. This makes it an extremely versatile finish, which seamlessly blends into widely different designs.

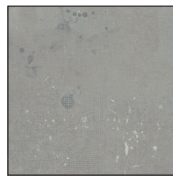

Copper Patina

Orange Rock

Pino Valkiria

Urban Loft

Wild Wood

### Tango

Tango is the result of the merger between design and technology. Texture and wood grain are united in perfect harmony in Fresno Tango. This new wood finish is noted for its elegant crowns and genuine wood details.

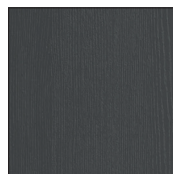

Fresno Rosario

Fresno Patagonia

Gris Tortora

Gris Gu

## Hygiene and antibacterial certification

The growing call for products that prevent the development of germs that are harmful to health has led FINSA to work in this research field, looking for materials that can meet these demands.

As a result of this work – we have developed our Antibacterial Studio Collection to meet these requirements.

The Antibacterial Studio Range is particularly suitable for applications where hygiene is a must, such as:

- Laboratories
- Kitchens and bathrooms
- Commercial and community facilities
- Children's furniture

This product has been certified by an external laboratory, the IMSL (Industrial Microbiological Services) in the UK, following the procedures outlined by ISO 22196 which confirms our Studio Range includes features that inhibit the growth and development of bacteria without harming the characteristics of the coating.

Certificate No. 1023308.1B

# Decorative real wood veneer solutions

## Studionatur Veneered MDF Exotic veneer species

Wood is ever-present in our lives. Throughout generations, it has accompanied us and has been a part of our living environments. It is in our past, present and future.

Technically, it consists of a thin layer of natural wood applied over a technical wood core medium, with infinite possibilities.

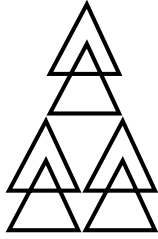

A decorative surface that we can see, feel and touch. A material with excellent performance, which offers the best results in a variety of applications: doors, furniture, panelling. Different and unique spaces, adapted and customised to any decorative style.

Full details of this range are available in our Studio Natur veneer brochure or from your sales representative.

# High resistance solutions

## Compacmel Plus

Produced using our high density MDF

Compacmel Plus is a compact board made of selected wood fibres and coated with decorative paper impregnated in melamine resins.

Compacmel Plus is specially designed for use in high humidity indoor environments or in applications requiring high resistance.

### Applications:

- Sports facilities: lockers, benches
- Commercial facilities: testing rooms, counters
- School and office furniture: shelves, tables, desks, etc.
- Hospital facilities: beds, tables, furniture doors, etc.
