IBERPAN 400 NAT 2,440 1,220 41mm WALNUT 035 037

Lightweight Superpan

SUPERPAN STAR 2,850 2,100 44mm

Lightweight Panels

- More sustainable - less wood and other constituents used in composition
- Lower logistics costs - up to 40% more cargo forwarded per shipment
- Current design trends use thick components
- Lightness - easier to handle and work with
- Convenience - they can be cut and edged, like standard panels
- Time Saving - No need to bond 18mm panels together to achieve thick sections
- Recoatable Board - No need to prime
