Technical Matt

Technical Matt is a new range of decorative solutions specially designed for heavy-duty horizontal use. The surface combines acrylic lacquers and an electron beam drying system that gives it excellent properties: it is antibacterial and resistant to scratching and dry heat.

This collection of designs in an ultra-matt, velvet-touch, antifingerprint finish, for use on horizontal or vertical surfaces, is also suitable for food contact.

Studio

We know the importance of the sense of touch when it comes to appreciating a good design, which is why the Studio range was created with the intention of creating versatile surfaces with unique, deep and registered textures; functionality and avant-garde melamine design are thereby combined.
