“My environmental principles are very important to me. When sourcing my new floors, I discovered the beautiful Swiszkrono range and found that they only use timber from sustainable sources, and the flooring is FSC certified. I was very happy to be able to renovate my home with renewable materials from Swiss managed forests while reducing my impact on the environment!”

WHY CHOOSE A GRAND SELECTION FLOOR?

INNOVATIVE

Looks and feels like a precious hardwood floor – Unrivalled in depth and the precision in how the structure meets perfectly with the decor. Produced with the latest technology and world famous Swiss Quality.

HEALTHY

Produced to strict European Standards. Emissions are the same as you would expect from wood in its natural state. GRAND SELECTION is made of 100% natural materials, mainly wood. This natural product, which according to a recent survey by the prestigious Fraunhofer Institut poses no risk to health. This makes it particularly suitable for young children and pets, who spend a lot of time in contact with the floor.

ECOLOGICAL

Made of wood from sustainably managed forests and whenever possible we look for the relevant FSC® certificates. Produced at the most modern, environmentally friendly production facility of its kind.

RESILIENT

Superior abrasion (cl. AC 5/33), scratch and impact resistance as well as colorfast (anti-fade) and anti-static properties.

AFFORDABLE

Unbeatable price/performance ratio compared to traditional hard wood floors. You not only save initially when buying the floor, but again later on in both money and time. It is a low maintenance easy care floor. There is no need to wax, polish or sand it, and it stays looking like the day you laid it for years and years.

INSTALLATION

The 5G connection is probably the most advanced click system on the market. It is simultaneously the fastest and easiest method for installing laminate flooring. The secret is a removable fiberglass tongue on the short side of the panel. The locking method is activated by a simple folding down motion. For further information visit: www.grand-selection.ch

CARE AND MAINTENANCE

Grand Selection laminate floors are very easy to care for. They do not need any special cleaning agents or additional treatment. A vacuum cleaner and the occasional damp mop is perfectly sufficient to clean your laminate floor.

Although they are tough and durable, they are not indestructible. The following simple precautions should protect your floor from scratches and other damage.

- Use dirt absorbant mats in the entrance areas
- Remove dirt, sand, grit from shoes
- Fit your furniture and chairs with felt pads
- Immediately wipe spilled liquids
- Use soft castors on office chairs

13

Regular Cleaning

- Remove dirt and dust from your floor with a soft brush or a duster
- Vacuum with a floor nozzle with soft brushes
- Occasionally wipe the floor with a damp (not wet cloth) and dry well afterwards. Clean water without detergents is adequate.

Not suitable

- Do not use steam cleaners, wet mops, polish, wax, oils, acids, abrasive cleaning agents, wet sponges or sanding
